Proposing best areas to live nearby Colombo

Senake Sandanayake

May 15, 2021

1. Introduction

1.1 Background

Colombo being the commercial capital of Sri Lanka, fairly a high percentage people who seek for an employment or people who seek for a better break in his/her career or people who need to change his/her career or Sri Lankans those who are living in other parts of the world and hoping to be back will be moved to Colombo & its suburbs and will be settled down in these areas.

Following are the main factors that drive people to move to Colombo & its suburbs.

- a) Most of the Headquarters of Departments, Authorities, Boards, and Companies are situated in Colombo.
- b) Availability of best Government schools, best Private Schools & best International schools in Colombo and its suburbs
- Availability of other facilities like various kinds of restaurants, shopping malls, entertainment places etc...
- d) Availability of newly built apartments & housing schemes at a competitive rate.
- e) High development rate compared to other areas.

When people are planning to move to Colombo & its suburbs, followings are the main requirements that they usually consider.

- a) Less populated area: (As they are coming from other parts of the country which are mostly less populated, the natural preference will be to select a similar environment.)
- b) Area which is within reasonable distance from city of Colombo.
- c) Area where you get all the necessary facilities around you. (Restaurants, Supermarkets, banks, ATMs, shopping places etc...)

1.2 Problem statement

As a Data Scientist how can you help a person to find out an area/areas in Colombo & its suburbs that satisfy the above mention three requirements?

2. Data sources

Sri Lanka is divided into 25 districts geographically. Each district is comprised of several Divisional Secretariats (DS Divisions) which are demarcated geographically. Colombo city lies in Colombo District itself. There is one more district very close to Colombo city, which is Gampaha district, as depicted in the below map. Therefore DS Divisions of these two districts (Colombo & Gampaha) will be considered to analyze.

DS Division, Population Density for Colombo & Gampaha districts are available in following **Wikipedia** sites:

https://en.wikipedia.org/wiki/Colombo District

https://en.wikipedia.org/wiki/Gampaha District

Latitude & Longitude for each DS Division will be obtained using **Nominatim** geodecoding service.

Foursquare API will be used to get the nearby venues for the DS Divisions.

3. Methodology

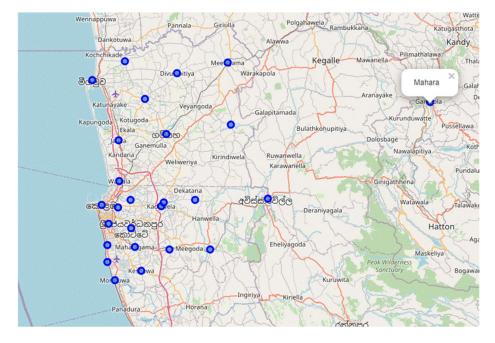

3.1 Data Visualization & Cleaning

Data scraped from two Wikipedia sites were combined into one table. Then latitude & longitude for each DS Division was added to the table using Nominatim geodecoding service. The features of the data frame were DS_Division, Population_Density, Latitude & Longitude. After that checked whether there were any missing values in the final table. No missing values were found.

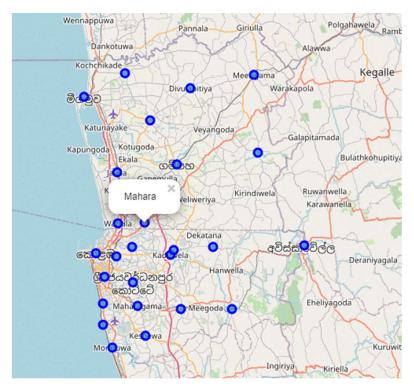

```
<class 'pandas.core.frame.DataFrame'>
RangeIndex: 26 entries, 0 to 25
Data columns (total 4 columns):
    Column
                         Non-Null Count
 0
    DS Division
                         26 non-null
                                         object
    Population_Density 26 non-null
 1
                                         object
 2
    Latitude
                         26 non-null
                                         float64
    Longitude
                         26 non-null
                                         float64
 3
dtypes: float64(2), object(2)
memory usage: 960.0+ bytes
```

The data type of Population_Density feature was object type and it was converted to float.

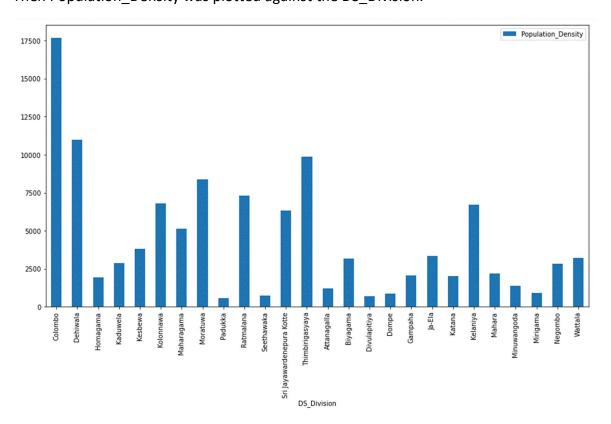

DS divisions were plotted on a map to see how the DS divisions were scattered around Colombo city as depicted below.

It was observed that geo coordinates for Mahara DS division is wrong. This is because there are two cities in the name of Mahara in Sri Lanka. This was corrected by using the same geodecoding service by giving both DS name and the District as the input. See the below map.

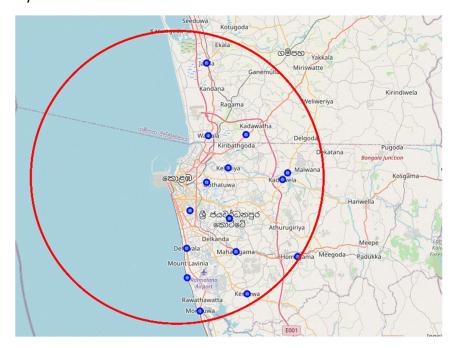

Then Population_Density was plotted against the DS_Division.

It was observed that population density in Colombo DS Division is extremely high compared to the other divisions. Therefore it was dropped from the data set as the final goal is to find less populated areas.

Distance from the Colombo city to all the DS visions were calculated using geo coordinates and new column was added to the data frame. Then DS Divisions which are more than 20km away from Colombo city were dropped. In Sri Lanka, it is quite common a person to travel 20km from his/her residence to work place on a daily basis.

Below diagram verify that final DS Divisions lies within 20km distance from the Colombo city.

Final table ended up with fifteen DS Divisions.

| | DS_Division | Population_Density | Latitude | Longitude | Dis_To_Colombo |
|----|---------------------------|--------------------|----------|-----------|----------------|
| 0 | Dehiwala | 10979.0 | 6.851279 | 79.865977 | 9.8 |
| 1 | Homagama | 1952.0 | 6.841273 | 80.003058 | 19.7 |
| 2 | Kaduwela | 2864.0 | 6.935703 | 79.984331 | 14.4 |
| 3 | Kesbewa | 3813.0 | 6.795740 | 79.940848 | 18.6 |
| 4 | Kolonnawa | 6815.0 | 6.932625 | 79.890314 | 4.1 |
| 5 | Maharagama | 5141.0 | 6.847278 | 79.926608 | 12.9 |
| 6 | Moratuwa | 8358.0 | 6.774682 | 79.882610 | 18.5 |
| 7 | Ratmalana | 7320.0 | 6.815259 | 79.866778 | 13.8 |
| 8 | Sri Jayawardenepura Kotte | 6324.0 | 6.888322 | 79.918741 | 9.1 |
| 9 | Thimbirigasyaya | 9874.0 | 6.897905 | 79.869608 | 4.9 |
| 10 | Biyagama | 3167.0 | 6.944490 | 79.990557 | 15.1 |
| 11 | Ja-Ela | 3353.0 | 7.079377 | 79.890763 | 16.2 |
| 12 | Kelaniya | 6735.0 | 6.950125 | 79.917271 | 7.1 |
| 13 | Mahara | 2205.0 | 6.991303 | 79.939375 | 11.1 |
| 14 | Wattala | 3228.0 | 6.989871 | 79.892709 | 7.1 |

3.2 Exploring Nearby Venues

Using **Foursquare API** name of the venue & category of the venue of all nearby venues that are within the radius of 2km was explored for each DS Division. Maximum number of venues for each DS Division was set to 100. Then a new data frame was created as follows.

| | DS_Division | Latitude | Longitude | Venue | Venue Category |
|---|-------------|----------|-----------|--------------------|----------------|
| 0 | Dehiwala | 6.851279 | 79.865977 | Al-Ameen Traders | Women's Store |
| 1 | Dehiwala | 6.851279 | 79.865977 | Yum Yum Fine Foods | Candy Store |
| 2 | Dehiwala | 6.851279 | 79.865977 | Beach House Bistro | Beach Bar |
| 3 | Dehiwala | 6.851279 | 79.865977 | Srina Palace | Cosmetics Shop |
| 4 | Dehiwala | 6.851279 | 79.865977 | Salon Anoma | Cosmetics Shop |

Then one hot encoding was used to create a new data frame with columns containing venue categories as depicted below.

| | DS_Division | ATM | Airport | Arcade | Art Gallery | Asian Restaurant | Athletics & Sports | BBQ Joint | Badminton Court | Bakery | Bar | Basketball Court | Beach | Beach Bar | Bookstore | Boutique | Breakf. |
|---|-------------|-----|---------|--------|----------------|---------------------|-----------------------|--------------|--------------------|--------|-----|---------------------|-------|--------------|-----------|----------|----------|
| 0 | Dehiwala | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | |
| 1 | Dehiwala | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | |
| 2 | Dehiwala | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 1 | 0 | 0 | |
| 3 | Dehiwala | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | |
| 4 | Dehiwala | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | |
| 4 | | | | | | | | | | | | | | | | |) |

By grouping rows on DS Division in above data frame and taking the mean of the frequency of occurrence of each category, a new data frame was created as below.

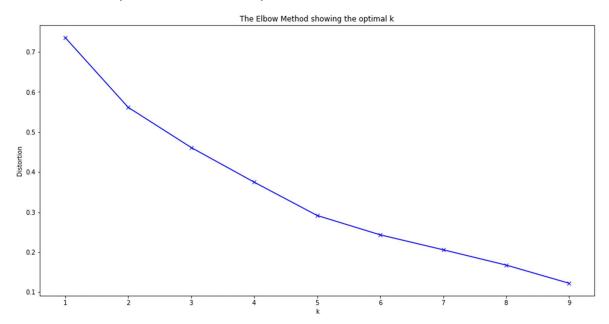

| | DS_Division | ATM | Airport | Arcade | Art Gallery | Asian Restaurant | Athletics & Sports | BBQ Joint | Badminton Court | Bakery | Bar | Basketball Court | Beach | Beach Bar | E |
|----|---------------------------------|----------|----------|----------|----------------|---------------------|-----------------------|--------------|--------------------|----------|----------|---------------------|----------|--------------|---|
| 0 | Biyagama | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.090909 | 0.090909 | 0.00 | 0.000000 | 0.000000 | |
| 1 | Dehiwala | 0.000000 | 0.000000 | 0.011905 | 0.00 | 0.071429 | 0.011905 | 0.011905 | 0.000000 | 0.083333 | 0.011905 | 0.00 | 0.023810 | 0.011905 | |
| 2 | Homagama | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | |
| 3 | Ja-Ela | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | |
| 4 | Kaduwela | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.100000 | 0.00 | 0.000000 | 0.000000 | |
| 5 | Kelaniya | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.166667 | 0.000000 | 0.00 | 0.000000 | 0.000000 | |
| 6 | Kesbewa | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.052632 | 0.000000 | 0.000000 | 0.000000 | 0.157895 | 0.000000 | 0.00 | 0.000000 | 0.000000 | |
| 7 | Kolonnawa | 0.083333 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | |
| 8 | Mahara | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.041667 | 0.000000 | 0.000000 | 0.000000 | 0.083333 | 0.000000 | 0.00 | 0.000000 | 0.000000 | |
| 9 | Maharagama | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.054054 | 0.000000 | 0.000000 | 0.027027 | 0.108108 | 0.000000 | 0.00 | 0.000000 | 0.000000 | |
| 10 | Moratuwa | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.000000 | 0.062500 | 0.00 | 0.000000 | 0.000000 | |
| 11 | Ratmalana | 0.000000 | 0.000000 | 0.000000 | 0.00 | 0.038462 | 0.000000 | 0.000000 | 0.000000 | 0.115385 | 0.000000 | 0.00 | 0.038462 | 0.000000 | |

| | | | | | | | | | | | | | | | F |

Above data frame was used to cluster the DS Divisions as per their nearby venue categories.

Another data frame was created with top 10 venue categories for each DS Division which would be later use to profile each cluster.

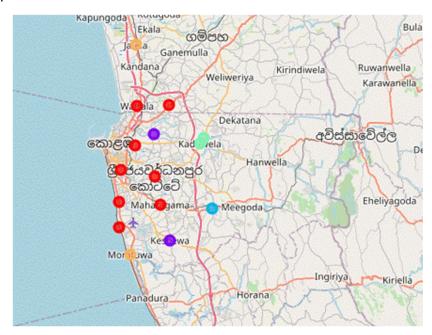

3.3 Clustering DS Divisions

K-Means clustering was used to cluster the DS Divisions. **Elbow method** was used to determine the optimum k value as depicted below.

As per the graph, optimum value of k was **5**. Therefore K-Means clustering were performed with k value of 5.

Below map shows the DS Division for each cluster.

DS Divisions and top 10 venue categories for each cluster was obtained.

Cluster -1 (Red Circles):

| | DS_Division | 1st Most Common Venue | 2nd Most Common Venue | 3rd Most Common Venue | 4th Most Common Venue | 5th Most Common Venue | 6th Most Common Venue | 7th Most Common Venue | 8th Most Common Venue | 9th Most Common Venue | 10th Most Common Venue |
|----|---------------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-------------------------------|-----------------------------|-----------------------------|------------------------------|
| 0 | Dehiwala | Bakery | Clothing Store | Asian Restaurant | Restaurant | Pizza Place | Fast Food Restaurant | Supermarket | Seafood Restaurant | Cosmetics Shop | Shopping Mall |
| 4 | Kolonnawa | Convenience Store | АТМ | IT Services | Bus Stop | Gym | Juice Bar | Fruit & Vegetable Store | Office | Department Store | Park |
| 5 | Maharagama | Supermarket | Bakery | Diner | Gym / Fitness Center | Asian Restaurant | Gym | Burger Joint | Pizza Place | Chinese Restaurant | Movie Theater |
| 7 | Ratmalana | Train Station | Bakery | Restaurant | Supermarket | Clothing Store | Bookstore | Pharmacy | Pizza Place | Department Store | Pub |
| 8 | Sri Jayawardenepura Kotte | Bakery | Chinese Restaurant | Fast Food Restaurant | Convenience Store | Coffee Shop | Juice Bar | Track | Supermarket | Restaurant | Food |
| 9 | Thimbirigasyaya | Café | Bakery | Dessert Shop | Restaurant | Pub | Bookstore | Coffee Shop | Hotel | Office | Chinese Restaurant |
| 13 | Mahara | Restaurant | Supermarket | Bus Station | Pizza Place | Clothing Store | Bakery | Ice Cream Shop | Grocery Store | Hotel Bar | Gym |
| 14 | Wattala | Bakery | Train Station | Clothing Store | Restaurant | Supermarket | Toll Booth | Food | Fast Food Restaurant | Pizza Place | Comfort Food Restaurant |

Cluster -2 (Violet Circles):

| | DS_Division | 1st Most Common Venue | 2nd Most Common Venue | 3rd Most Common Venue | 4th Most Common Venue | 5th Most Common Venue | 6th Most Common Venue | 7th Most Common Venue | 8th Most Common Venue | 9th Most Common Venue | 10th Most Common Venue |
|----|-------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-------------------------------|------------------------------|
| 3 | Kesbewa | Bakery | Grocery Store | Clothing Store | Fast Food Restaurant | Bus Station | Asian Restaurant | Department Store | Chinese Restaurant | Restaurant | Supermarket |
| 12 | Kelaniya | Bus Station | Bakery | Chinese Restaurant | Supermarket | Grocery Store | Convenience Store | Department Store | Pizza Place | Fruit & Vegetable Store | Dessert Shop |

Cluster-3(Blue Circles):

| DS_Division | 1st Most Common Venue | 2nd Most Common Venue | 3rd Most Common Venue | 4th Most Common Venue | 5th Most Common Venue | 6th Most Common Venue | 7th Most Common Venue | 8th Most Common Venue | 9th Most Common Venue | 10th Most Common Venue |
|-------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|------------------------------|
| 1 Homagama | Train Station | Hotel | Supermarket | Clothing Store | Bus Station | Women's Store | Donut Shop | Flower Shop | Fast Food Restaurant | Electronics Store |

Cluster-4(Green Circles):

| | DS_Division | 1st Most Common Venue | 2nd Most Common Venue | 3rd Most Common Venue | 4th Most Common Venue | 5th Most Common Venue | 6th Most Common Venue | 7th Most Common Venue | 8th Most Common Venue | 9th Most Common Venue | 10th Most Common Venue |
|----|-------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|------------------------------|
| 2 | Kaduwela | Boutique | Bar | Chinese Restaurant | Restaurant | Bus Station | Pizza Place | Supermarket | Pharmacy | Grocery Store | Gym |
| 10 | Biyagama | Pharmacy | Bakery | Breakfast Spot | Pizza Place | Supermarket | Restaurant | Chinese Restaurant | Bar | Grocery Store | Gym |

Cluster-5(Yellow Circles):

| | DS_Division | 1st Most Common Venue | 2nd Most Common Venue | 3rd Most Common Venue | 4th Most Common Venue | 5th Most Common Venue | 6th Most Common Venue | 7th Most Common Venue | 8th Most Common Venue | 9th Most Common Venue | 10th Most Common Venue |
|----|-------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|------------------------------|
| 6 | Moratuwa | Pizza Place | Chinese Restaurant | Train Station | Supermarket | Bar | Restaurant | Fast Food Restaurant | Food | Lake | Tech Startup |
| 11 | Ja-Ela | Pizza Place | Train Station | Supermarket | Platform | Clothing Store | Department Store | Restaurant | Seafood Restaurant | Movie Theater | Fast Food Restaurant |

4. Results

Goal was to find DS Divisions with fairly modern neighborhoods with less populated and lies within reasonable distance to Colombo City.

Out of the five clusters, cluster one mark with red circles would be the DS divisions with modern neighborhood compared to other clusters. Below table shows the DS divisions in that particular cluster with population density and distance to Colombo city.

| | Population_Density | Latitude | Longitude | Dis_To_Colombo |
|---------------------------|--------------------|----------|-----------|----------------|
| D\$_Division | | | | |
| Dehiwala | 10979.0 | 6.851279 | 79.865977 | 9.8 |
| Kolonnawa | 6815.0 | 6.932625 | 79.890314 | 4.1 |
| Maharagama | 5141.0 | 6.847278 | 79.926608 | 12.9 |
| Ratmalana | 7320.0 | 6.815259 | 79.866778 | 13.8 |
| Sri Jayawardenepura Kotte | 6324.0 | 6.888322 | 79.918741 | 9.1 |
| Thimbirigasyaya | 9874.0 | 6.897905 | 79.869608 | 4.9 |
| Mahara | 2205.0 | 6.991303 | 79.939375 | 11.1 |
| Wattala | 3228.0 | 6.989871 | 79.892709 | 7.1 |

From above, one could easily choose a DS division depending upon his/her priority of population density and distance to Colombo city.

5. Conclusion

In this study, I analyzed the neighborhoods around the DS Divisions which are within 20kms from the Colombo city to find out the DS Divisions which are of modern neighborhoods. Also I compared the population density and distance to Colombo city so that one could easily select a DS division depending upon his/her priority.

6. Further directions

It was observed that venues explored were lower than the actuals. This will definitely give the better clustering output. Therefore it needs to be addressed. Also I don't consider the land prices in each DS divisions which I think, will be useful for recommending an area.
